

Host Referral Agreement

Version 2026-08-20-v2 | Draft for Canadian counsel review

Parties and purpose

This agreement is between PostcardPerks and the property host identified in the acceptance record. It governs VENDOR_INVOICE offers. The host may distribute the supplied signed guide links, matching QR code, and approved message copy. The host does not sell, operate, warrant, or collect payment for an activity.

Property share

For VENDOR_INVOICE offers, the host earns 8% of completed attributed activity value recorded in the PostcardPerks ledger. No share is earned on views, clicks, voided referrals, or activity value that PostcardPerks does not collect from the vendor.

Payout method and minimum

For VENDOR_INVOICE offers, a host share becomes payable only after PostcardPerks collects the related vendor invoice. PostcardPerks pays collected balances monthly by Stripe Connect or another agreed electronic transfer method. Balances under CAD \$50 roll forward; any collected final balance is paid within 45 days after termination.

Opt-in partial-payment pilot

CUSTOMER_PARTIAL_PAYMENT is a separate, opt-in pilot and remains on HOLD. It requires a separate versioned payment agreement, verified tax status, and Stripe Connect readiness. Only an approved native-checkout offer may collect a disclosed partial payment through Stripe; the vendor collects the remaining balance at the activity.

Tax and identity information

The host is an independent participant and is responsible for its own income, GST/HST, and other tax obligations. The host will provide identity, address, and tax information reasonably required by law. PostcardPerks may issue a T4A or other required information statement and will provide an annual ledger summary.

Host responsibilities

The host will use the supplied property links without altering their signature, avoid unapproved claims, and remove or update placements when requested. The host will promptly report guest-safety concerns and will not represent itself as the activity operator.

Roster and measurement

The host previews and mutually approves the founding vendor roster before launch. Channel reporting may combine host-entered eligible-stay and delivery totals with first-party guide events; manual totals are identified as such.

Term, suspension, and exit

The agreement is month-to-month. Either party may terminate without cause on 30 days written notice. PostcardPerks may suspend distribution immediately for fraud, unlawful use, guest-safety risk, or material breach. Accrued payment, record-keeping, confidentiality, and liability terms survive termination.

Records and acceptance

Electronic acceptance stores the typed legal name, timestamp, IP address, agreement version, and SHA-256 version hash. The signer confirms they have authority to bind the property host.

Host legal name: _____ Authorized signer: _____

Date: _____

Legal review note: confirm tax-slip treatment, limitation of liability, indemnity, privacy, and dispute terms with Canadian counsel before first production acceptance.
